Education

Institute of Automation, Chinese Academy of Sciences (CASIA) 2023 – Present
PhD student in Pattern Recognition and Intelligent Systems (NLPR). Advisors: Shizhu He and Kang Liu.

North China Electric Power University (NCEPU) 2019 – 2023
Bachelor of Engineering in Intelligence Science and Technology (Innovation Class). Rank: **1/13**.

Research Interests

I work toward foundation models for **long-horizon adaptive intelligence**: models that use growing contexts effectively, retain reusable capabilities, and act reliably over extended interactions.

Long-Context Data & Model Co-Design: data curation and synthesis, length- and capability-aware pretraining and mid-training mixtures, efficient attention and KV caches, and architectures that improve long-context capability, scalability, and efficiency (LCLM-Horizon, HyCo$_2$, SparK, ResAdapt, AllocEmbed).

Knowledge & Continual Adaptation: acquiring, transferring, internalizing and updating knowledge and capabilities, balancing plasticity, retention and generalization (TAGI, SHIP, DyPRAG, AAG, NesyCD, SKIntern, SpaRTA).

Agent Learning & Self-Improvement: persistent memory, long-horizon decisions and learning from interaction and feedback, toward verifiable improvement of agent memory, policies and learning procedures (CITI, KATE, BuPO, Tool-RL-Box, OPERATE, Distill Yourself, SLE).

Selected Publications and Working Papers

Selected Awards

- **CAST Young Science and Technology Talent Cultivation Program** (Doctoral Student Special Plan). 2026
- **National Scholarship** (three awards). 2021 / 2022 / 2025
- **Beijing Outstanding Graduate**. Jun. 2023

Research Experience

Tencent (Project UP), Beijing Jul. 2026 – Sep. 2026

Foundation Model Pretraining: Data and Modeling

Designed multi-QA long-context data and delivered **290B tokens across eight 8K–1M ranges**, with QA structure and mixtures informed by 10B-token ablations. Developed compact block selectors and fused execution; archived MiniCPM/H200 batch-4 tests showed **1.11–1.36× Prefill speedup over Sparse** at 32K–128K. Built an **8.13M-sample SVG corpus (41B tokens)** with SVGFaith-based semantic screening and a **48K-pair sketch-to-code dataset**.

ByteDance, Beijing Jun. 2025 – Jun. 2026

Efficient Multimodal Understanding

Deployed efficient multimodal features for AIGC detection and embedding retrieval. Proposed ResAdapt/CAPO to adjust video-frame resolution for efficient reasoning; contributed to AllocEmbed/RDPO for efficient video retrieval. Built OPERATE to evaluate agents in changing environments.

Ant Group, Beijing Feb. 2025 – May 2025

Long-Context Modeling and Compression

Proposed $HyCo_2$ to shorten long inputs while retaining their overall meaning and relevant evidence. Contributed to the LCLM-Horizon survey and curated and maintained Awesome-LCLM.
